Filtronic

Further US satellite progress

Contract announcement

Tech hardware and equipment

16 September 2026

Filtronic has confirmed that it has won a follow-on contract from the unnamed US-based satellite customer that it started working with in March. The $8.0m/£5.9m contract expands on the initial development contract signed in June for prototype units to be deployed on satellites. The contract is expected to contribute to revenue in FY27 and FY28 and underpins our forecasts.

Year end	Revenue (£m)	EBITDA (£m)	PBT (£m)	EPS (p)	DPS (p)	P/E (x)	Yield (%)
5/25	56.3	17.0	15.1	6.83	0.00	31.5	N/A
5/26	55.5	11.3	8.1	3.47	0.00	62.0	N/A
5/27e	59.6	11.8	5.4	1.64	0.00	N/A	N/A
5/28e	75.1	15.2	8.6	2.72	0.00	79.0	N/A

Note: EBITDA, PBT and EPS (diluted) are normalised, excluding amortisation of acquired intangibles, exceptional items and share-based payments.

Filtronic has secured a follow-on contract with a US-based customer for the design, development and build of prototype units to be deployed on satellites. The contract is worth $8.0m/£5.9m and follows on from the $0.5m/£0.4m development contract announced in June, for the design of a high-frequency module for use on satellite payload. Filtronic won its first contract with this customer in March, with an $8.0m/£6.0m contract to provide amplifiers based on gallium nitride technology.

The company expects the contract to be completed in H128 and expects to recognise revenue across FY27 and FY28. We view this contract as supportive of our forecasts. As a reminder, when it reported results in August, the company noted that it had nearly 95% order coverage of FY27 consensus revenue. As well as taking this closer to 100%, this contract helps build visibility for FY28, where we have 26% revenue growth factored in.
