

# Newron Pharmaceuticals

Trial update

## Sarizotan fails to shine

Pharma & biotech

On 4 May Newron Pharmaceuticals announced that the pivotal Rett syndrome STARS study of sarizotan had not met the primary or any secondary endpoints. The company will focus now on its novel schizophrenia drug, Evenamide. This clinical programme, due to resume in 2020, is on hold due to COVID-19. Newron drew a €7.5m EIB loan on 15 April and had €39m in cash in December 2019.

Year end	Revenue (€m)	PBT* (€m)	EPS* (€)	DPS (€)	P/E (x)	Yield (%)
12/18	4.03	(15.01)	(0.84)	0.0	N/A	N/A
12/19	7.04	(20.16)	(1.13)	0.0	N/A	N/A
12/20e	5.56	(17.05)	(0.96)	0.0	N/A	N/A
12/21e	6.63	(29.44)	(1.65)	0.0	N/A	N/A

Note: \*PBT and EPS are normalised, excluding amortisation of acquired intangibles, share-based payments. FY20 and FY21 forecasts are retained but subject to further guidance.

The STARS study of sarizotan showed no efficacy so development has stopped. In our former valuation of CHF340m, now withdrawn, we had assumed a 30% probability of success and discounted value of CHF211m.

Newron will now focus on Evenamide for schizophrenia. In H119, the FDA delayed the two planned pivotal studies due to safety concerns. On 9 January, Newron announced that it would run a four-week exploratory safety study in patients with schizophrenia. However, on 31 March Newron announced a delay due to the COVID-19 pandemic. As yet, there is no revised timeline. We anticipate that the safety study may conclude by mid-2021, which would allow Phase III studies possibly from Q321. We have not changed our expectation for sales to start in 2025.

We have retained current FY20 and FY21 forecasts. Xadago (safinamide) royalties are as previously forecast. In the US, WorldMeds Pharma, the Xadago sublicensee, has exited the CNS market by selling its portfolio, including Xadago, to Supernus Pharmaceuticals. This may be beneficial to Newron from 2021 if it leads to more sales investment. A trial to gain a label extension in L-DOPA-induced dyskinesia is being planned. There may, however, be lower R&D costs in 2020 due to trial delays and no registration costs. In 2021, potential pre-marketing costs for sarizotan will not now be incurred so SG&A might be lower.
